14 APLIKASI PRESENTASI 1
Microsoft PowerPoint

Pencapaian Pembelajaran

- Dapat memahami pengertian ekosistem
- Dapat menyebutkan kegunaan Ms Power Point
- Dapat membuat animasi gambar

Pembahasan Materi

a. Mengenal Aplikasi Power Point

Fungsi Microsoft PowerPoint

Microsoft PowerPoint adalah perangkat lunak presentasi yang dikembangkan oleh Microsoft. Fungsi utama Microsoft PowerPoint adalah untuk membuat presentasi multimedia yang menarik dengan menggunakan slide, teks, gambar, grafik, video, dan suara. Berikut adalah beberapa fungsi utama Microsoft PowerPoint:

- Membuat presentasi yang profesional dan menarik

Kita dapat membuat slide yang berisi teks, gambar, grafik, dan video, dan mengatur tata letak serta desain slide sesuai kebutuhan.

- Mengatur urutan slide

Kita dapat dengan mudah mengganti urutan slide, menghapus atau menambahkan slide baru, serta menentukan efek perpindahan antar slide.

- Menambahkan elemen visual dan menyisipkan multimedia

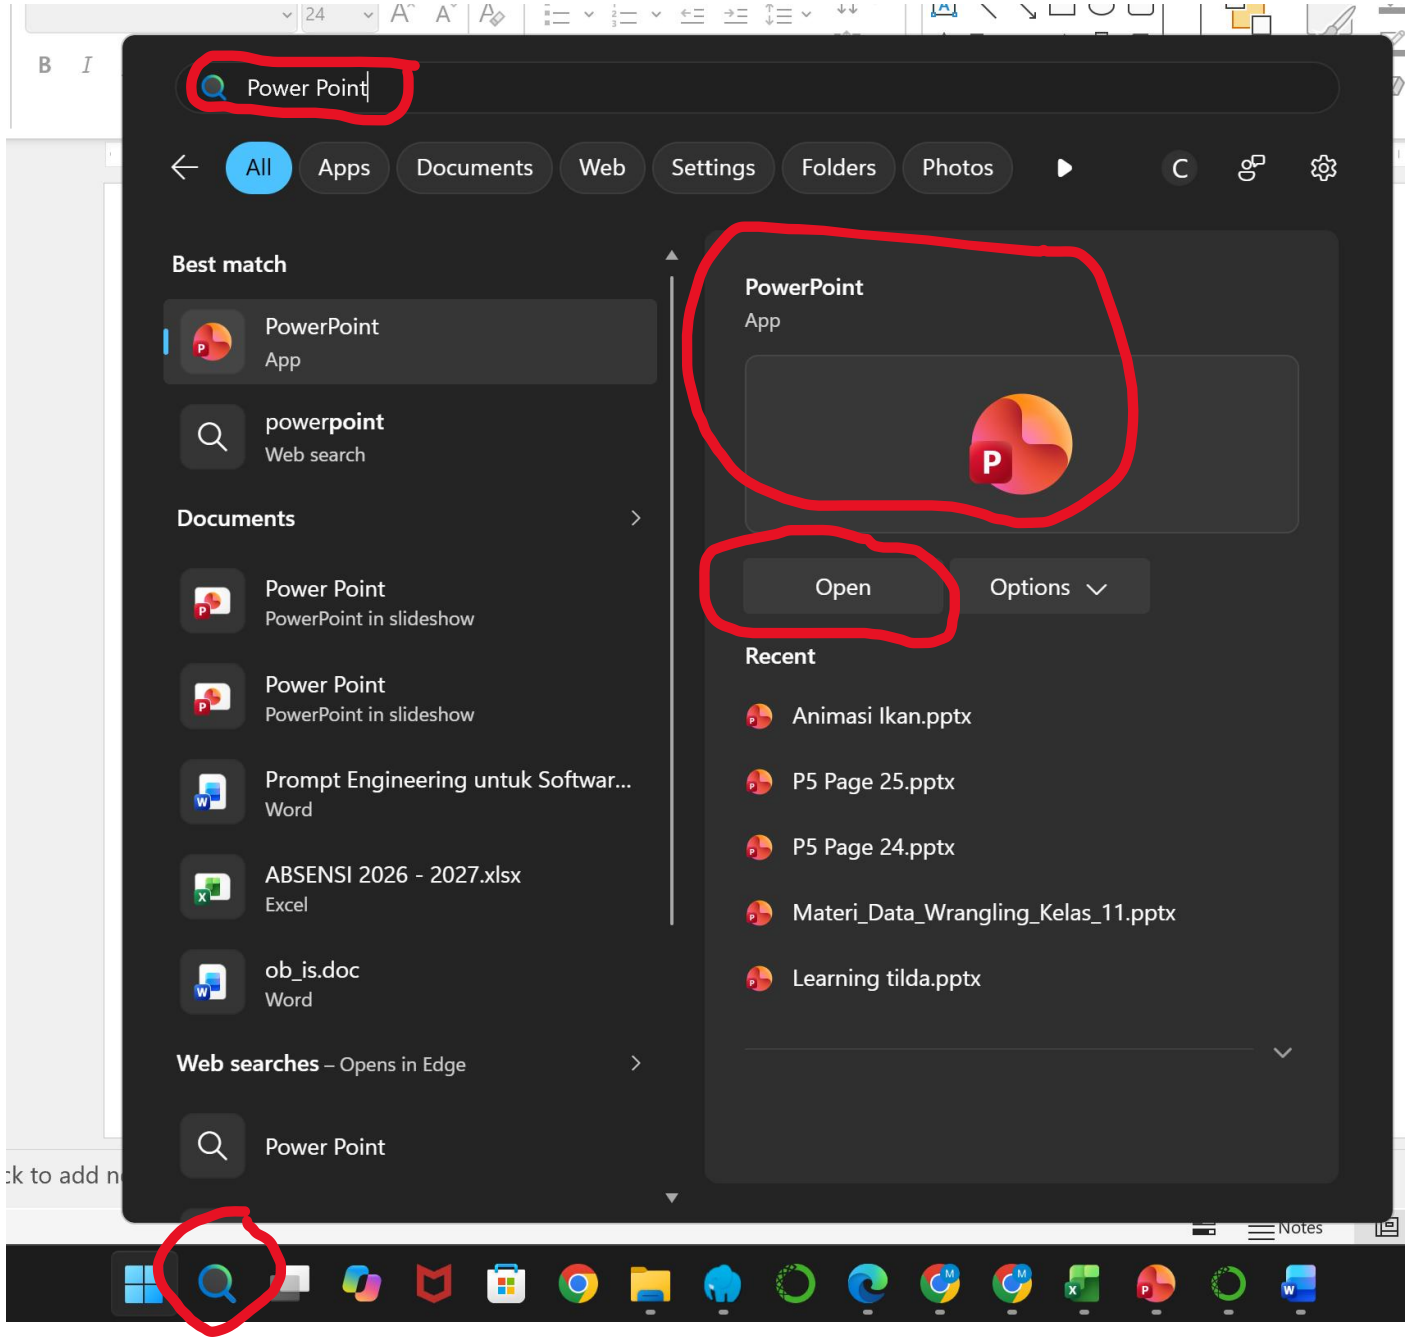

Kita dapat menambahkan gambar, grafik, bentuk, ikon, suara video dan elemen visual lainnya ke dalam slide.

b. Aktivitas

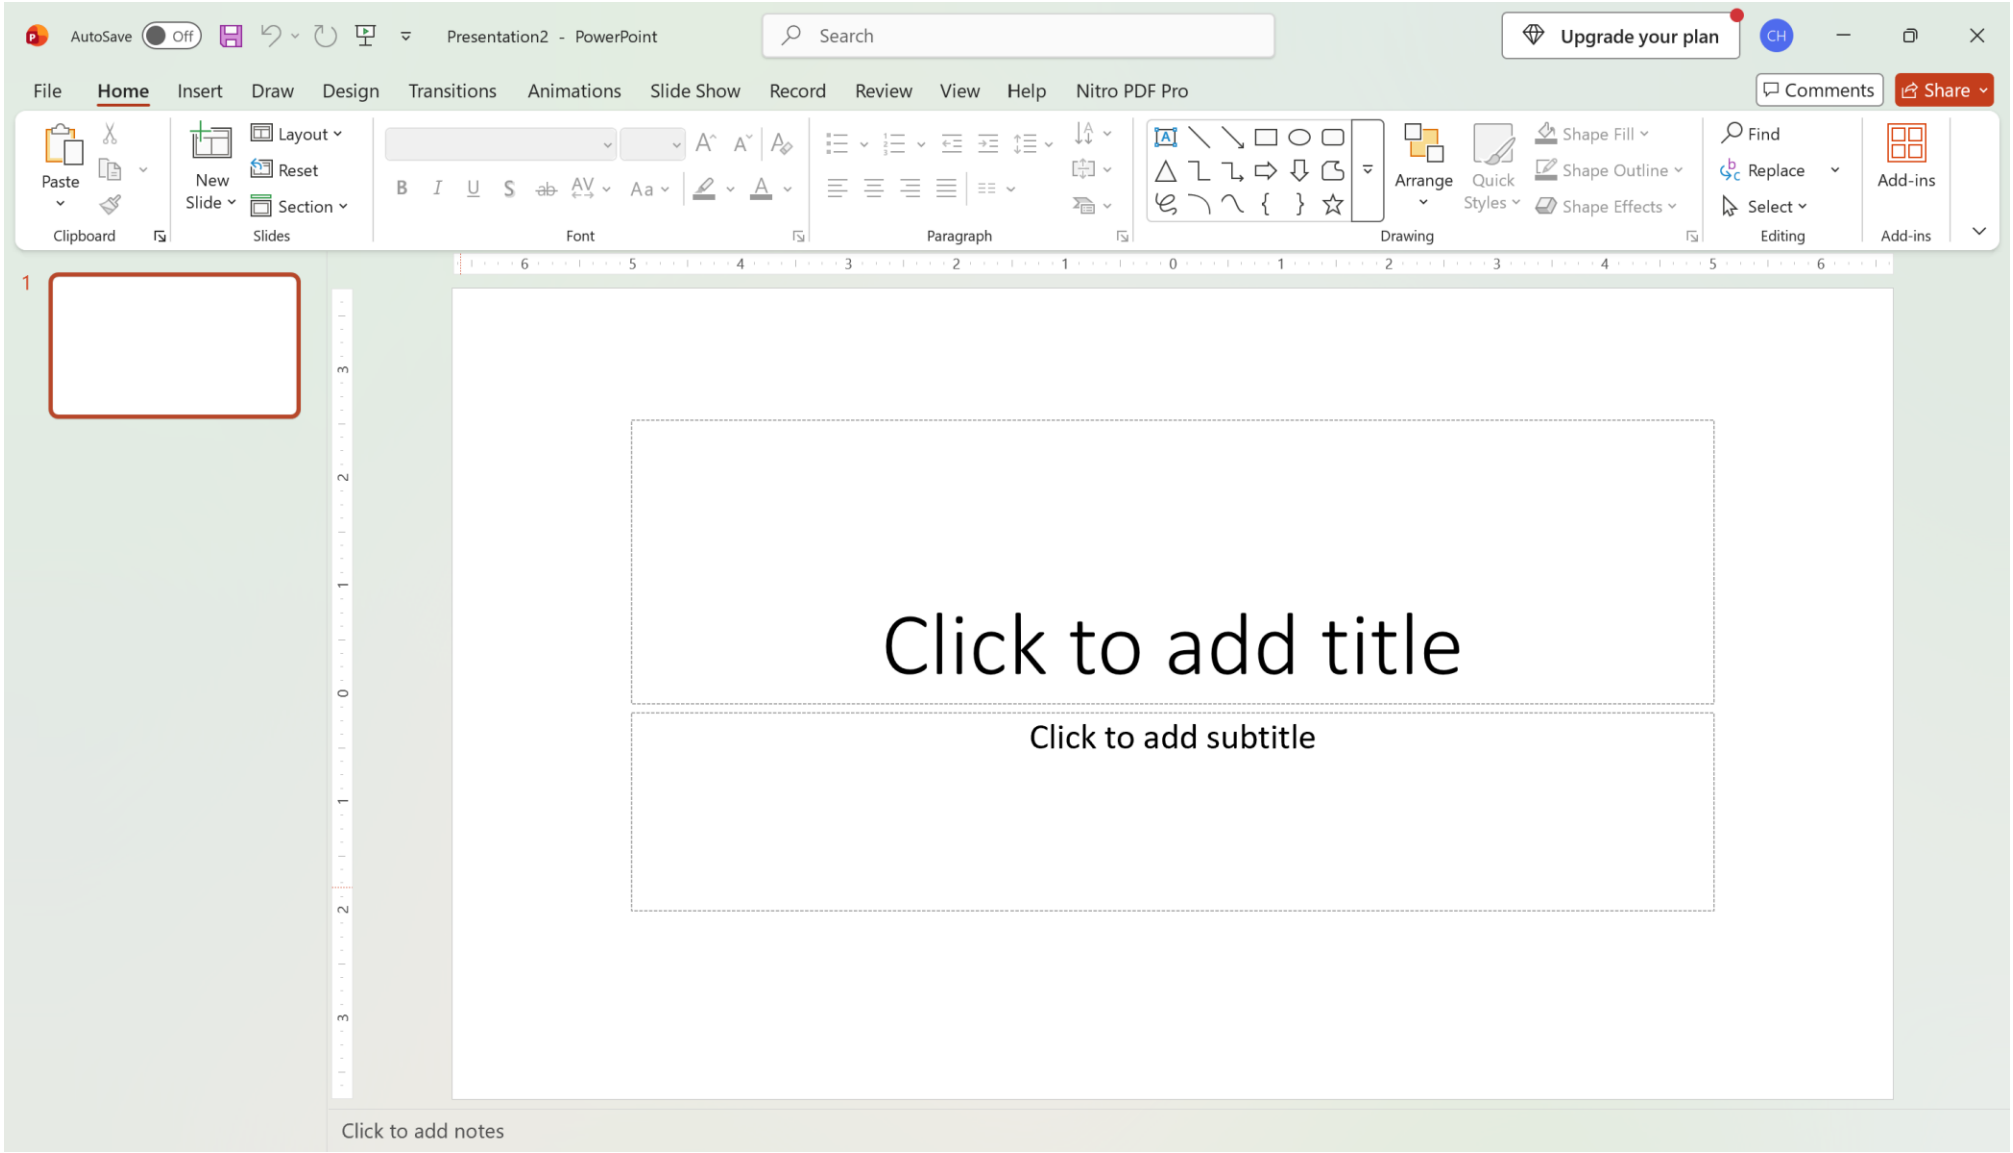

Membuat animasi gambar ikan dalam akuarium.

1. Jalankan aplikasi Ms. PowerPoint/Open Office Impress
2. Buatlah gambar akuarium dengan menggunakan *shape*, lalu pilih *cube*
3. Masukkan gambar latar untuk akuarium dengan cara klik di cube, lalu pada menu *shape fill* pilih drop kebawah dan pilih *picture*. Pada menu *insert picture* yang muncul pilih *from a file*. Pilih gambar untuk latar belakang akuarium kita.

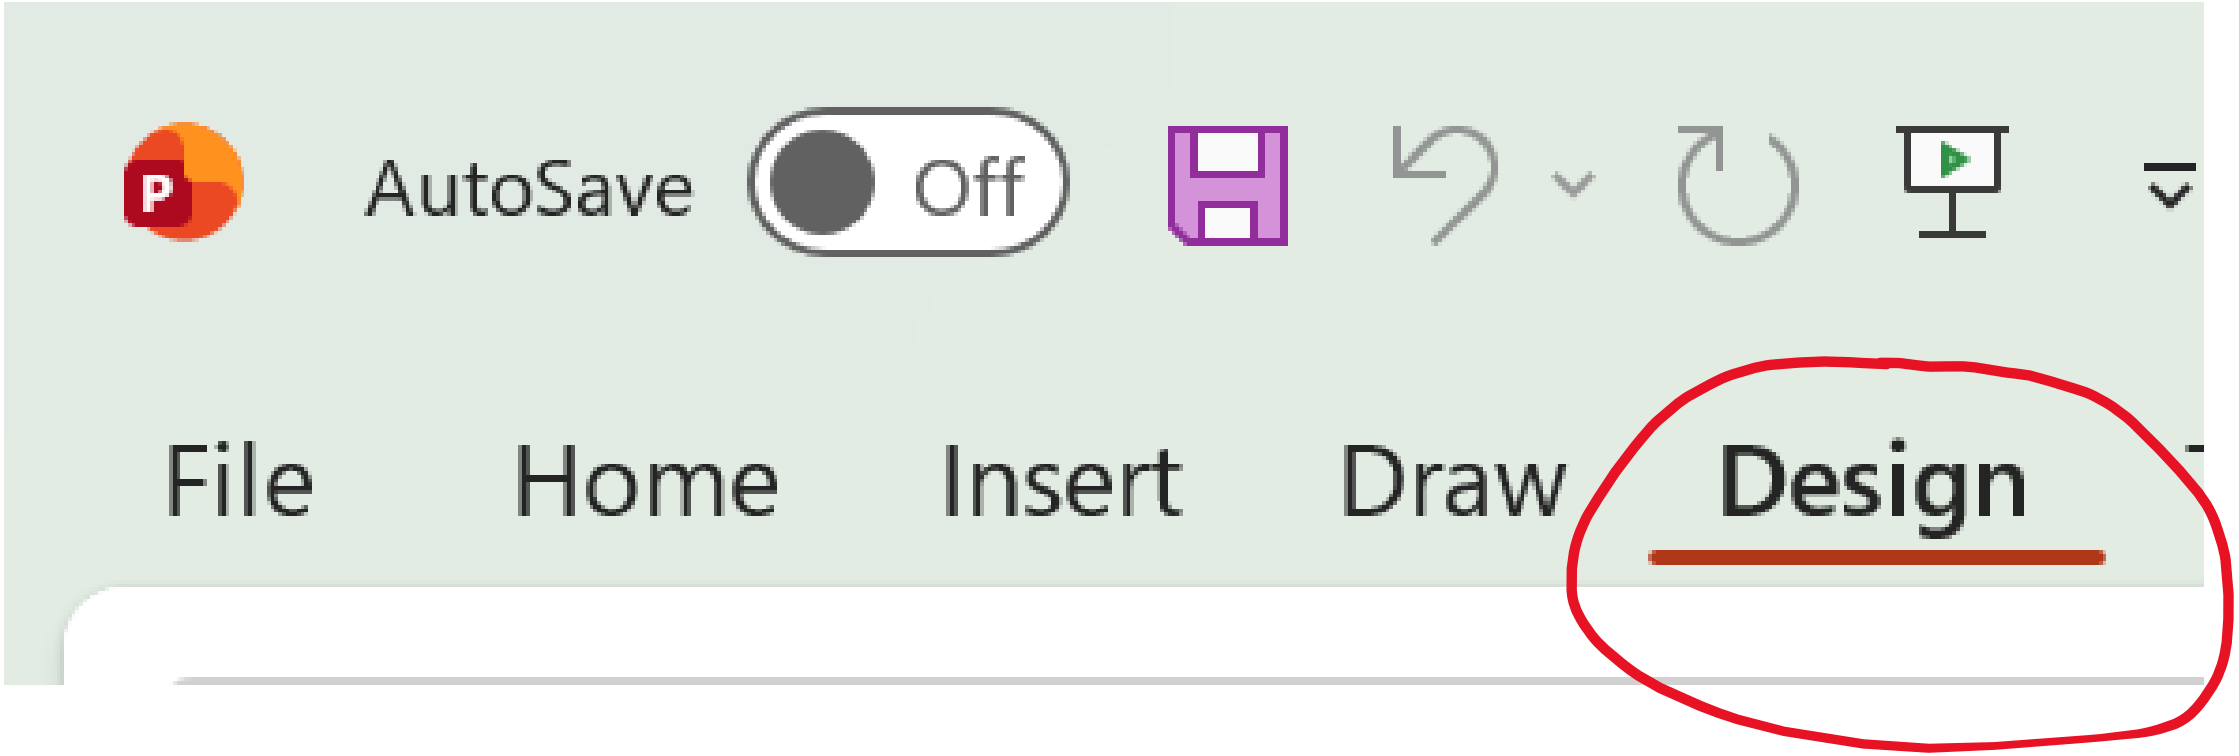

Buka Microsoft Power Point

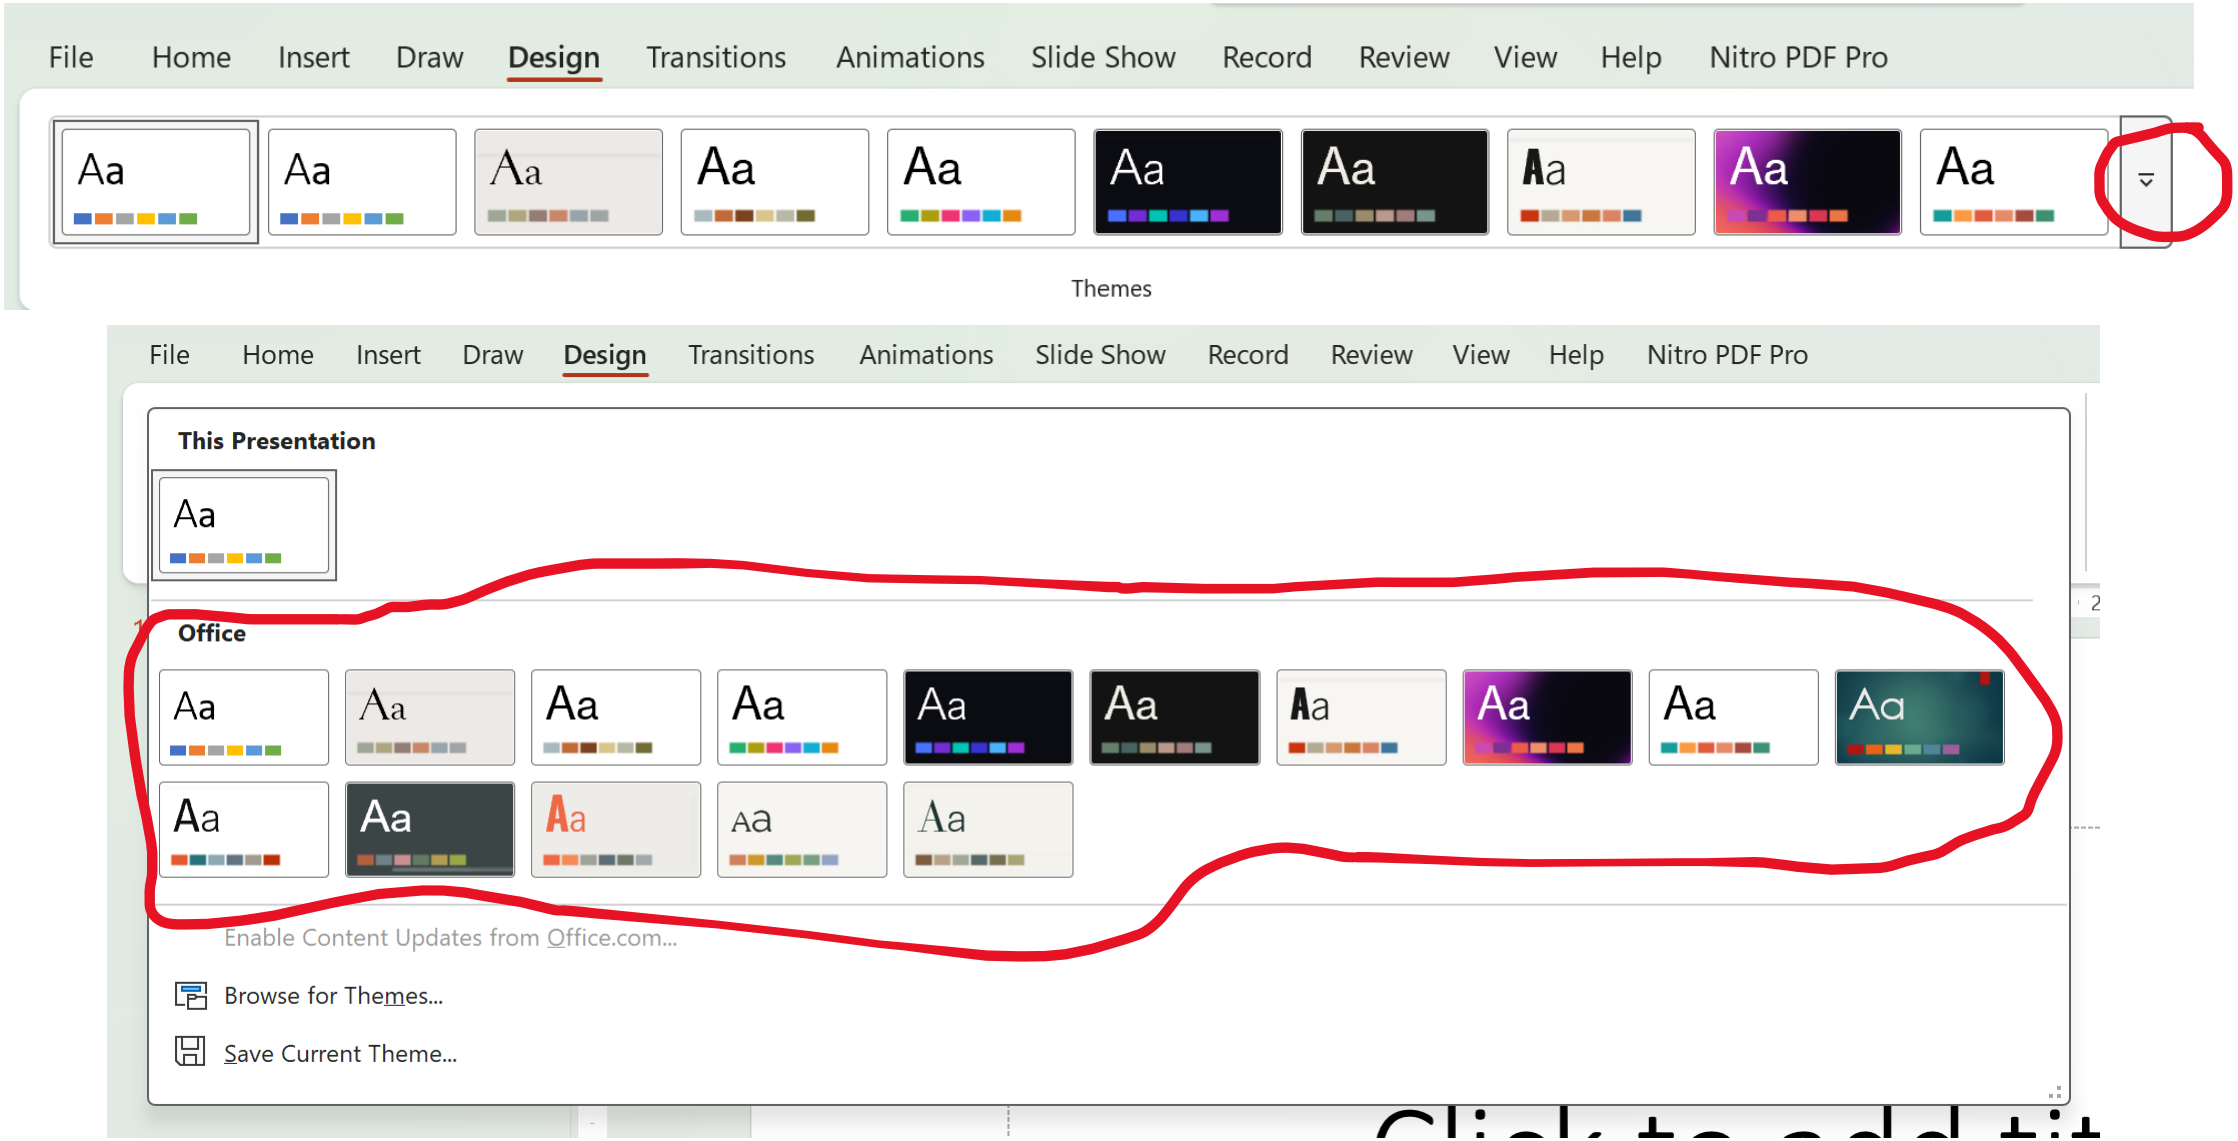

Hingga terbuka seperti ini

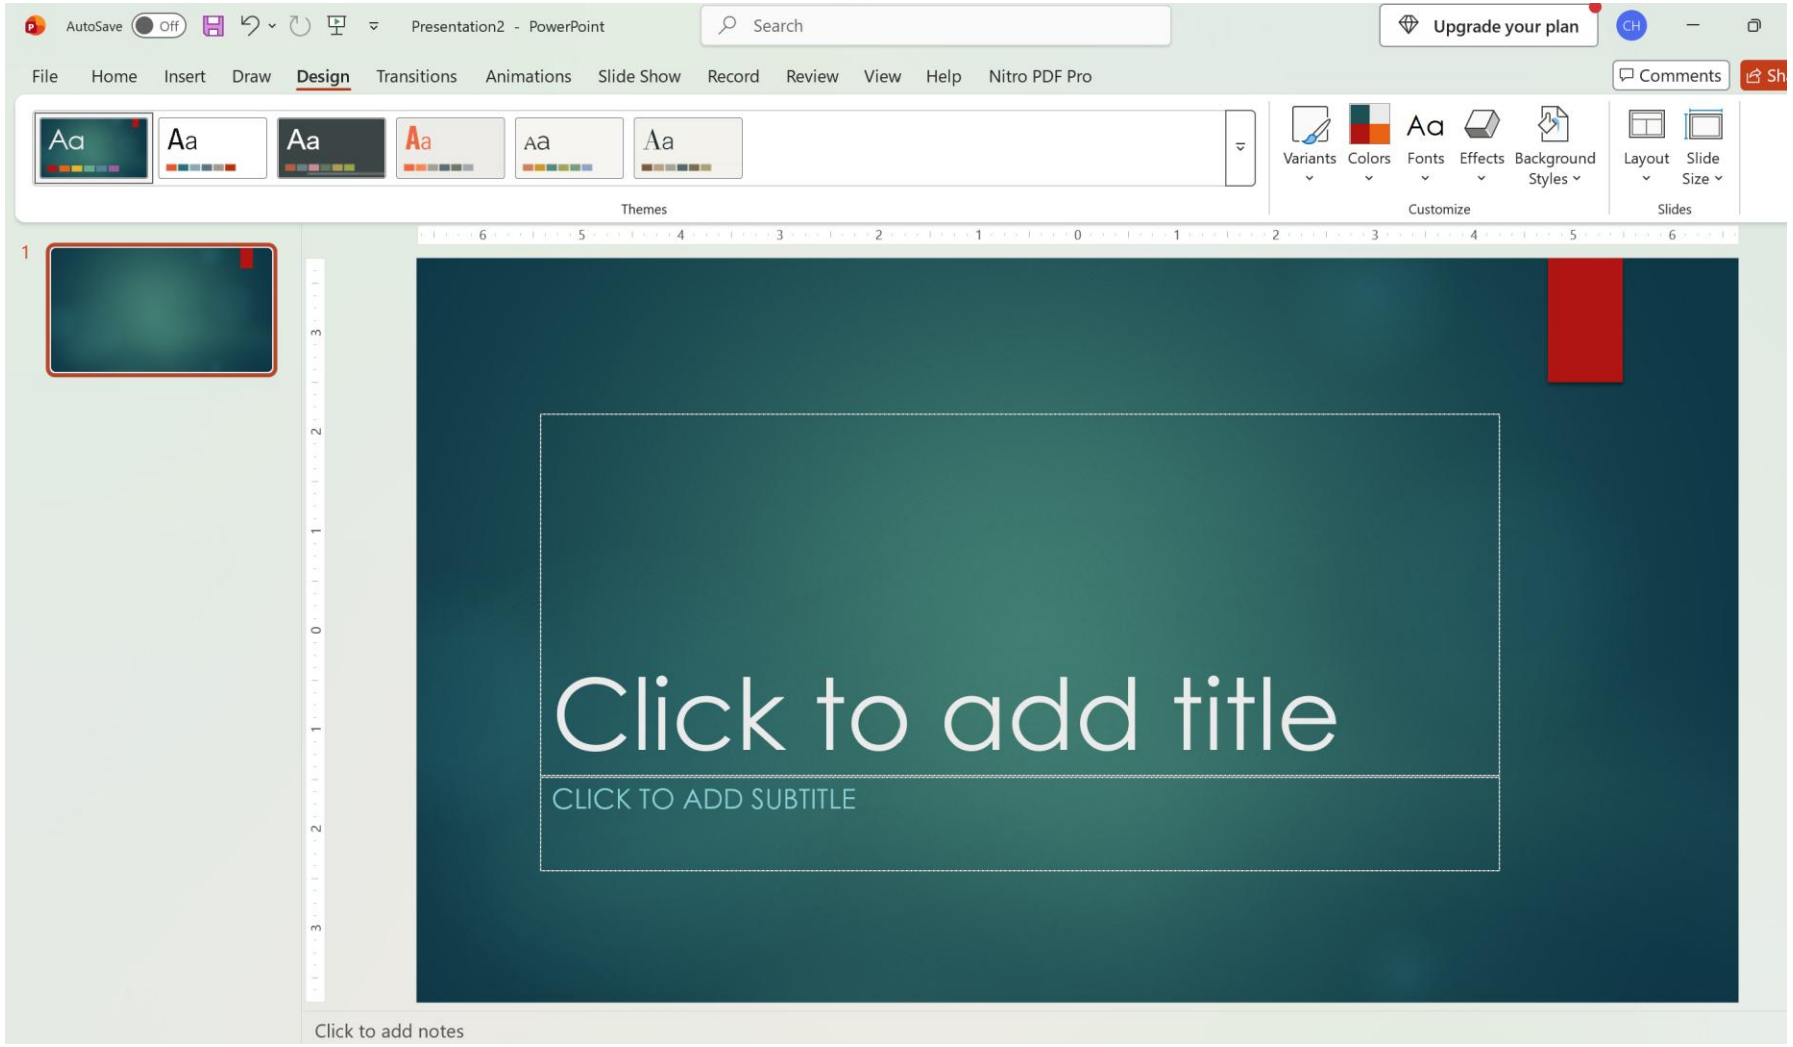

Klik menu “Design”

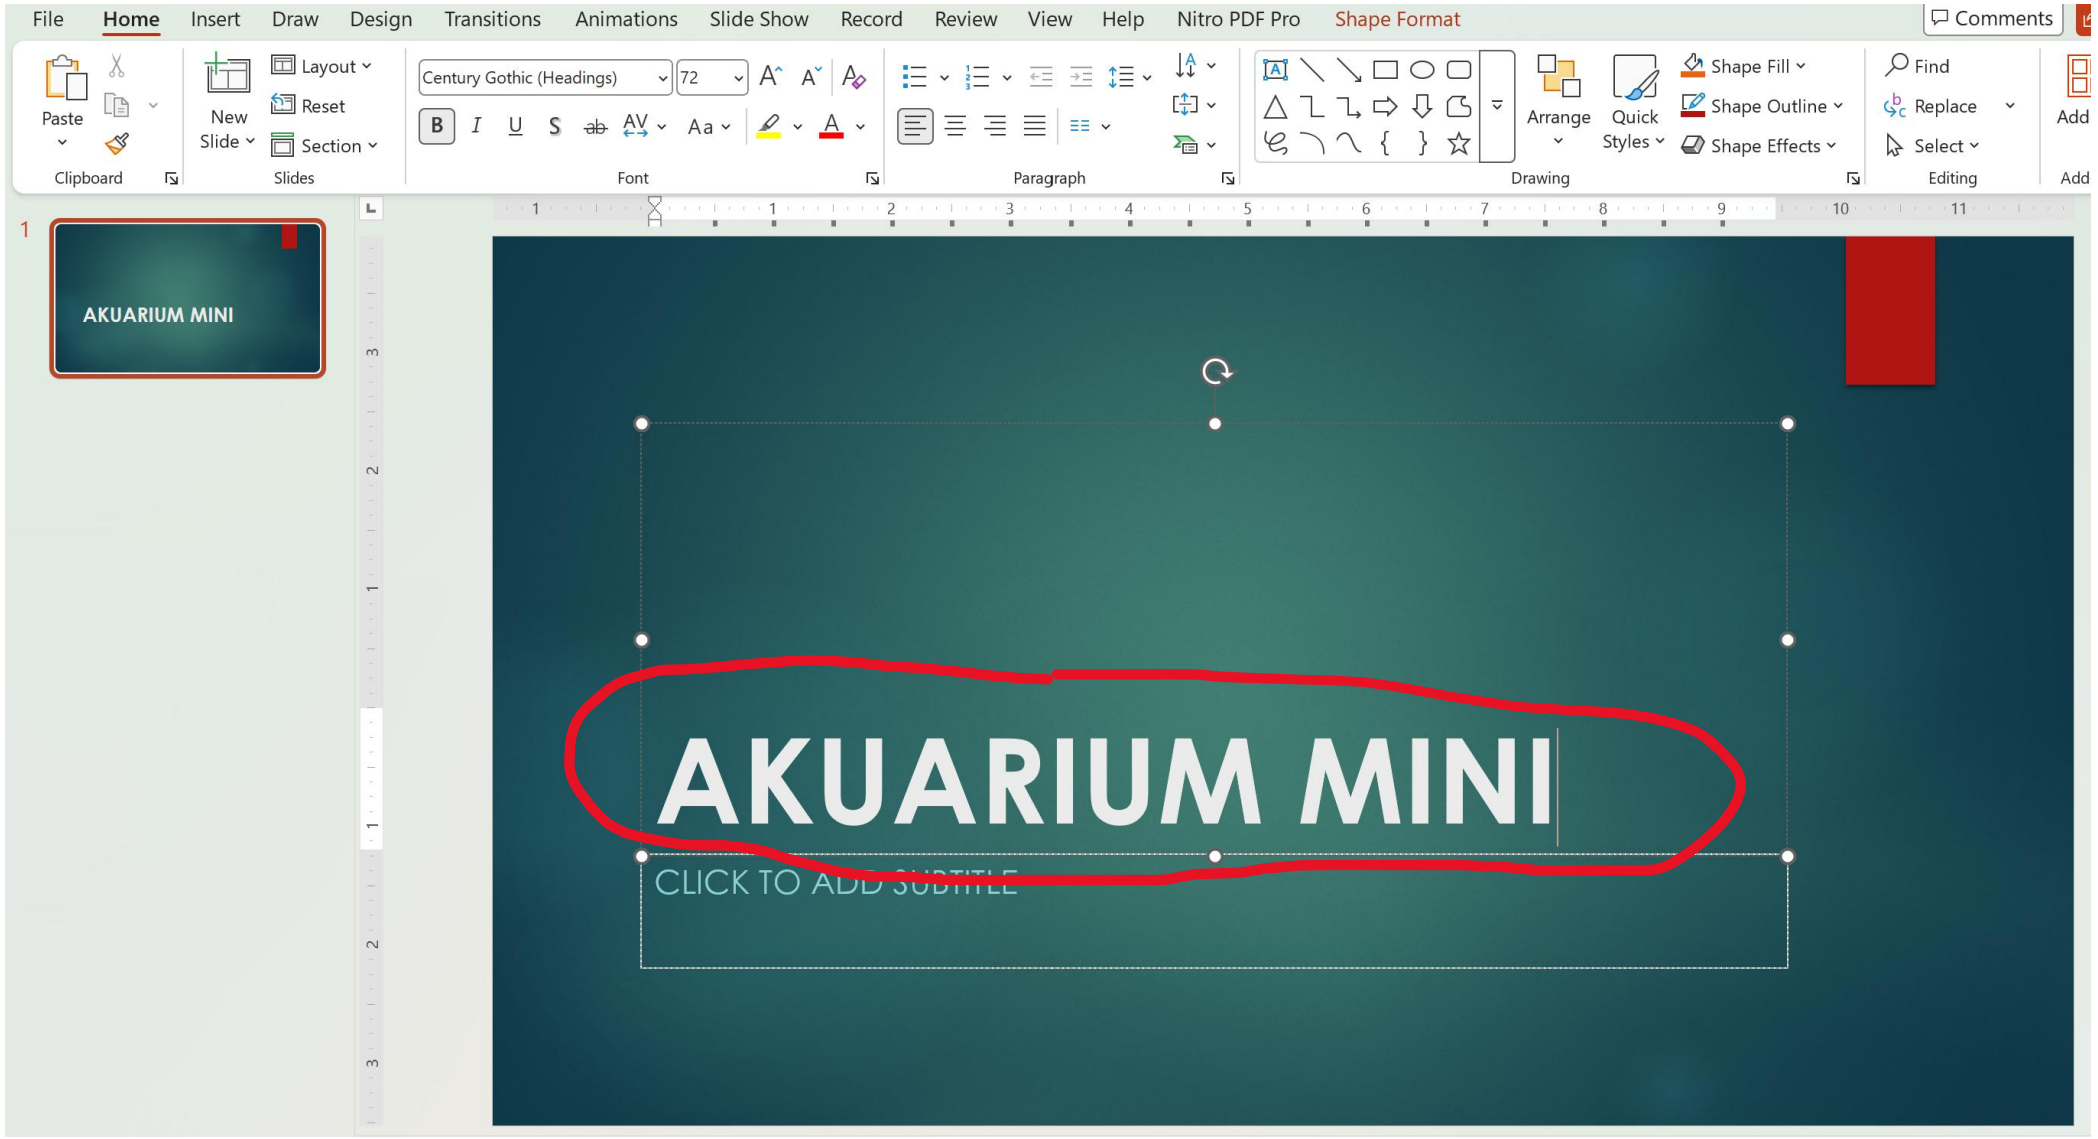

Pilih Design yang kamu mau

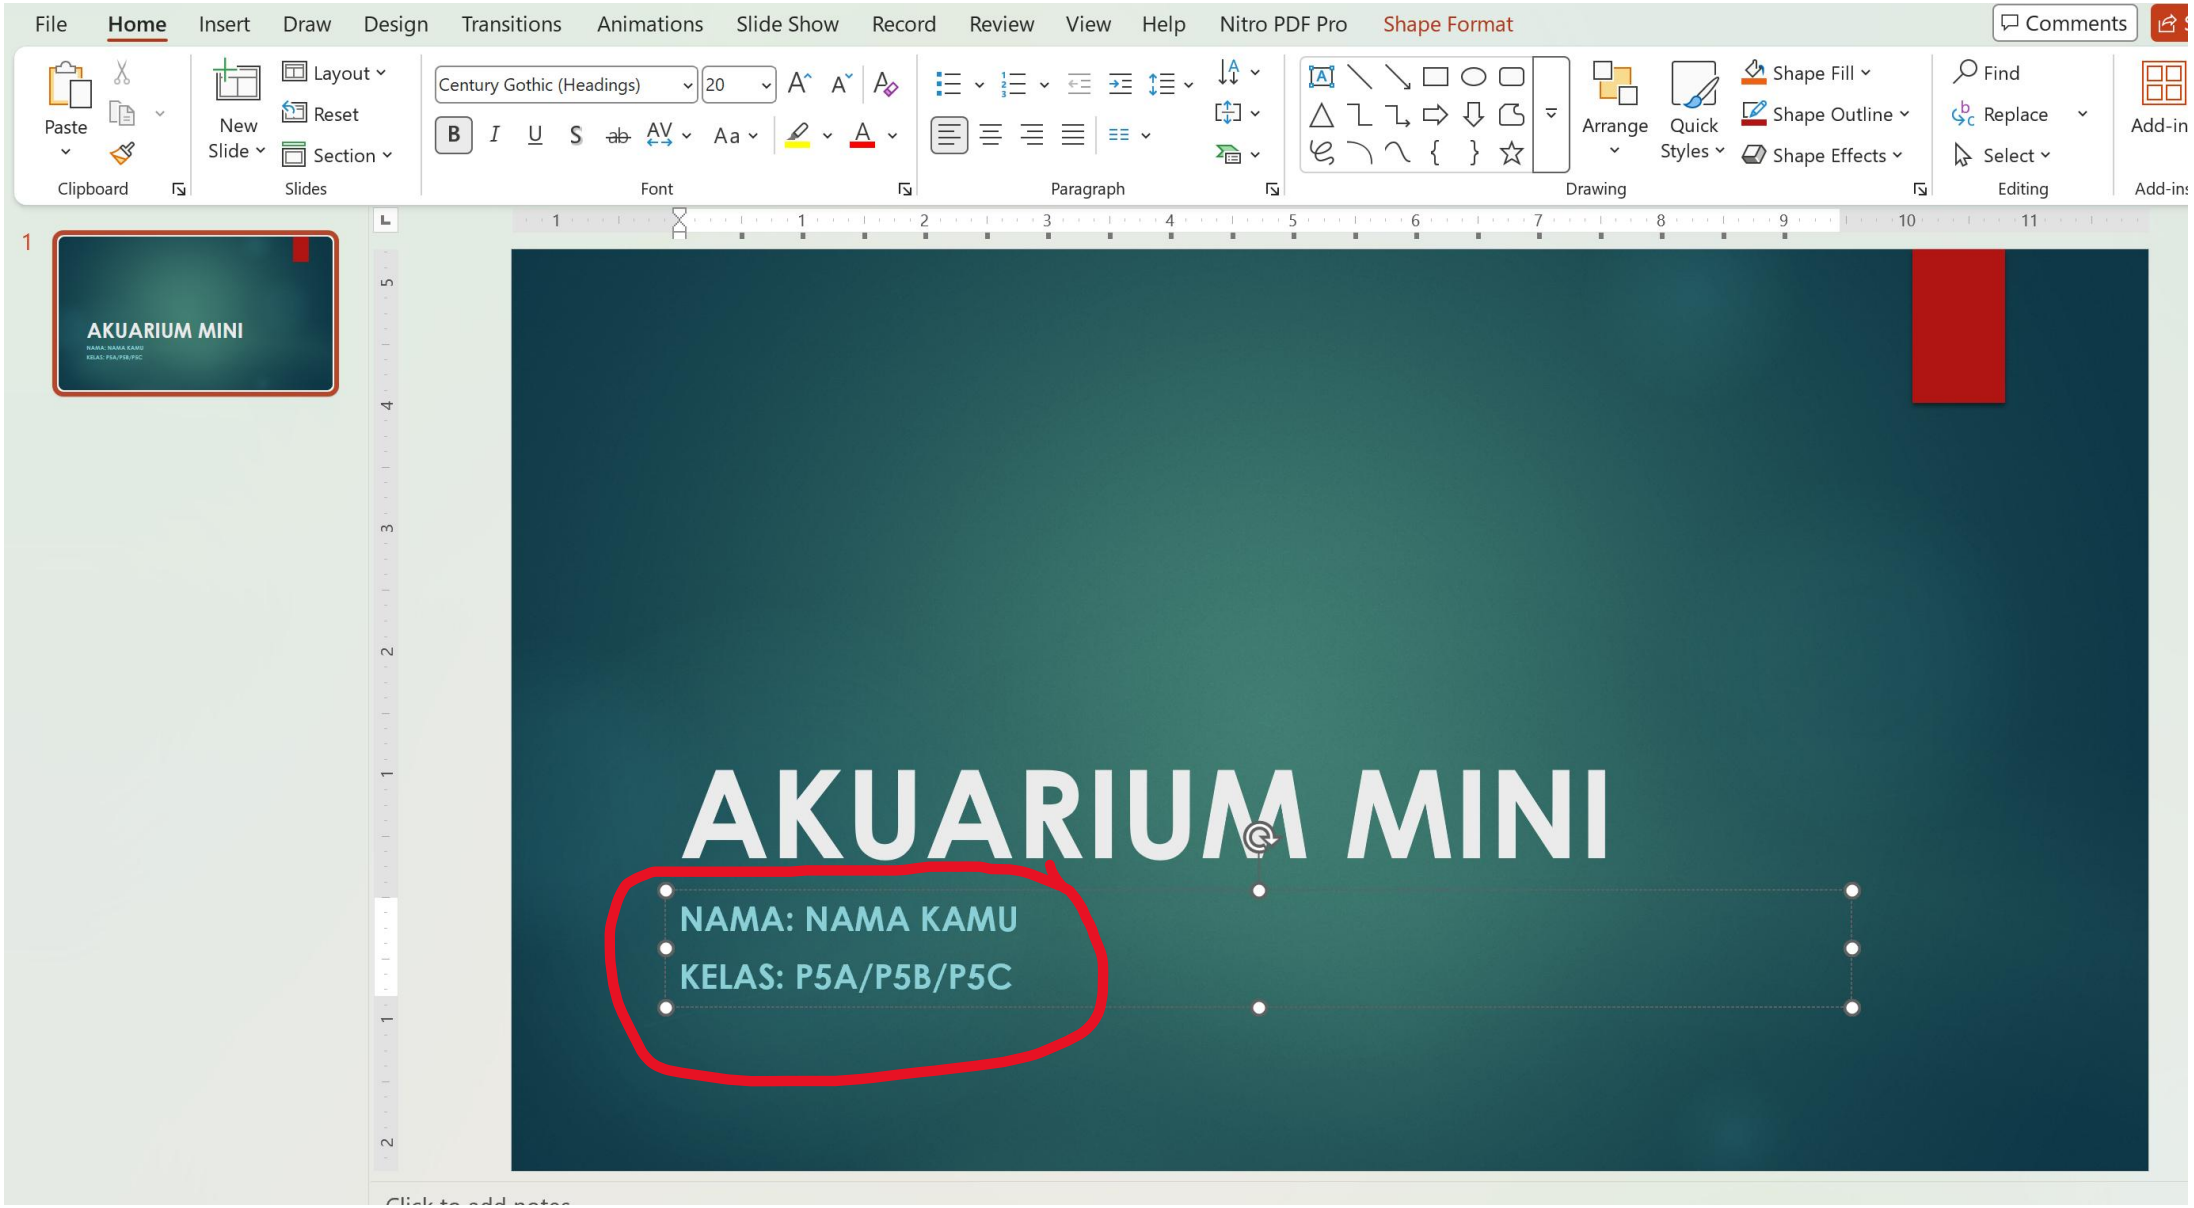

Hingga design masuk ke tampilan seperti ini

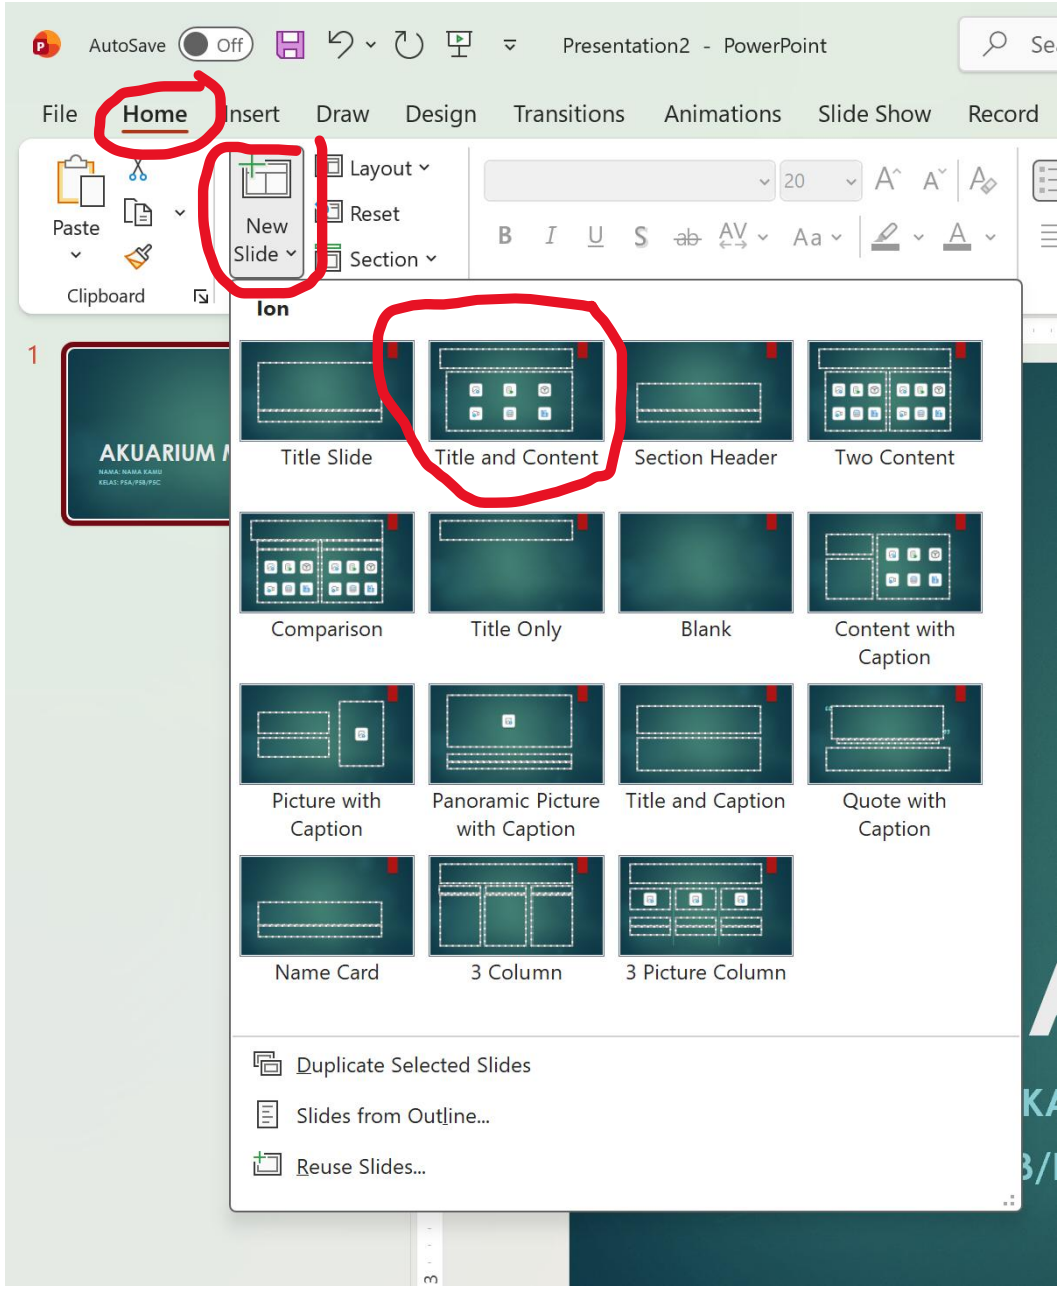

Buat Judulnya “AKUARIUM MINI”

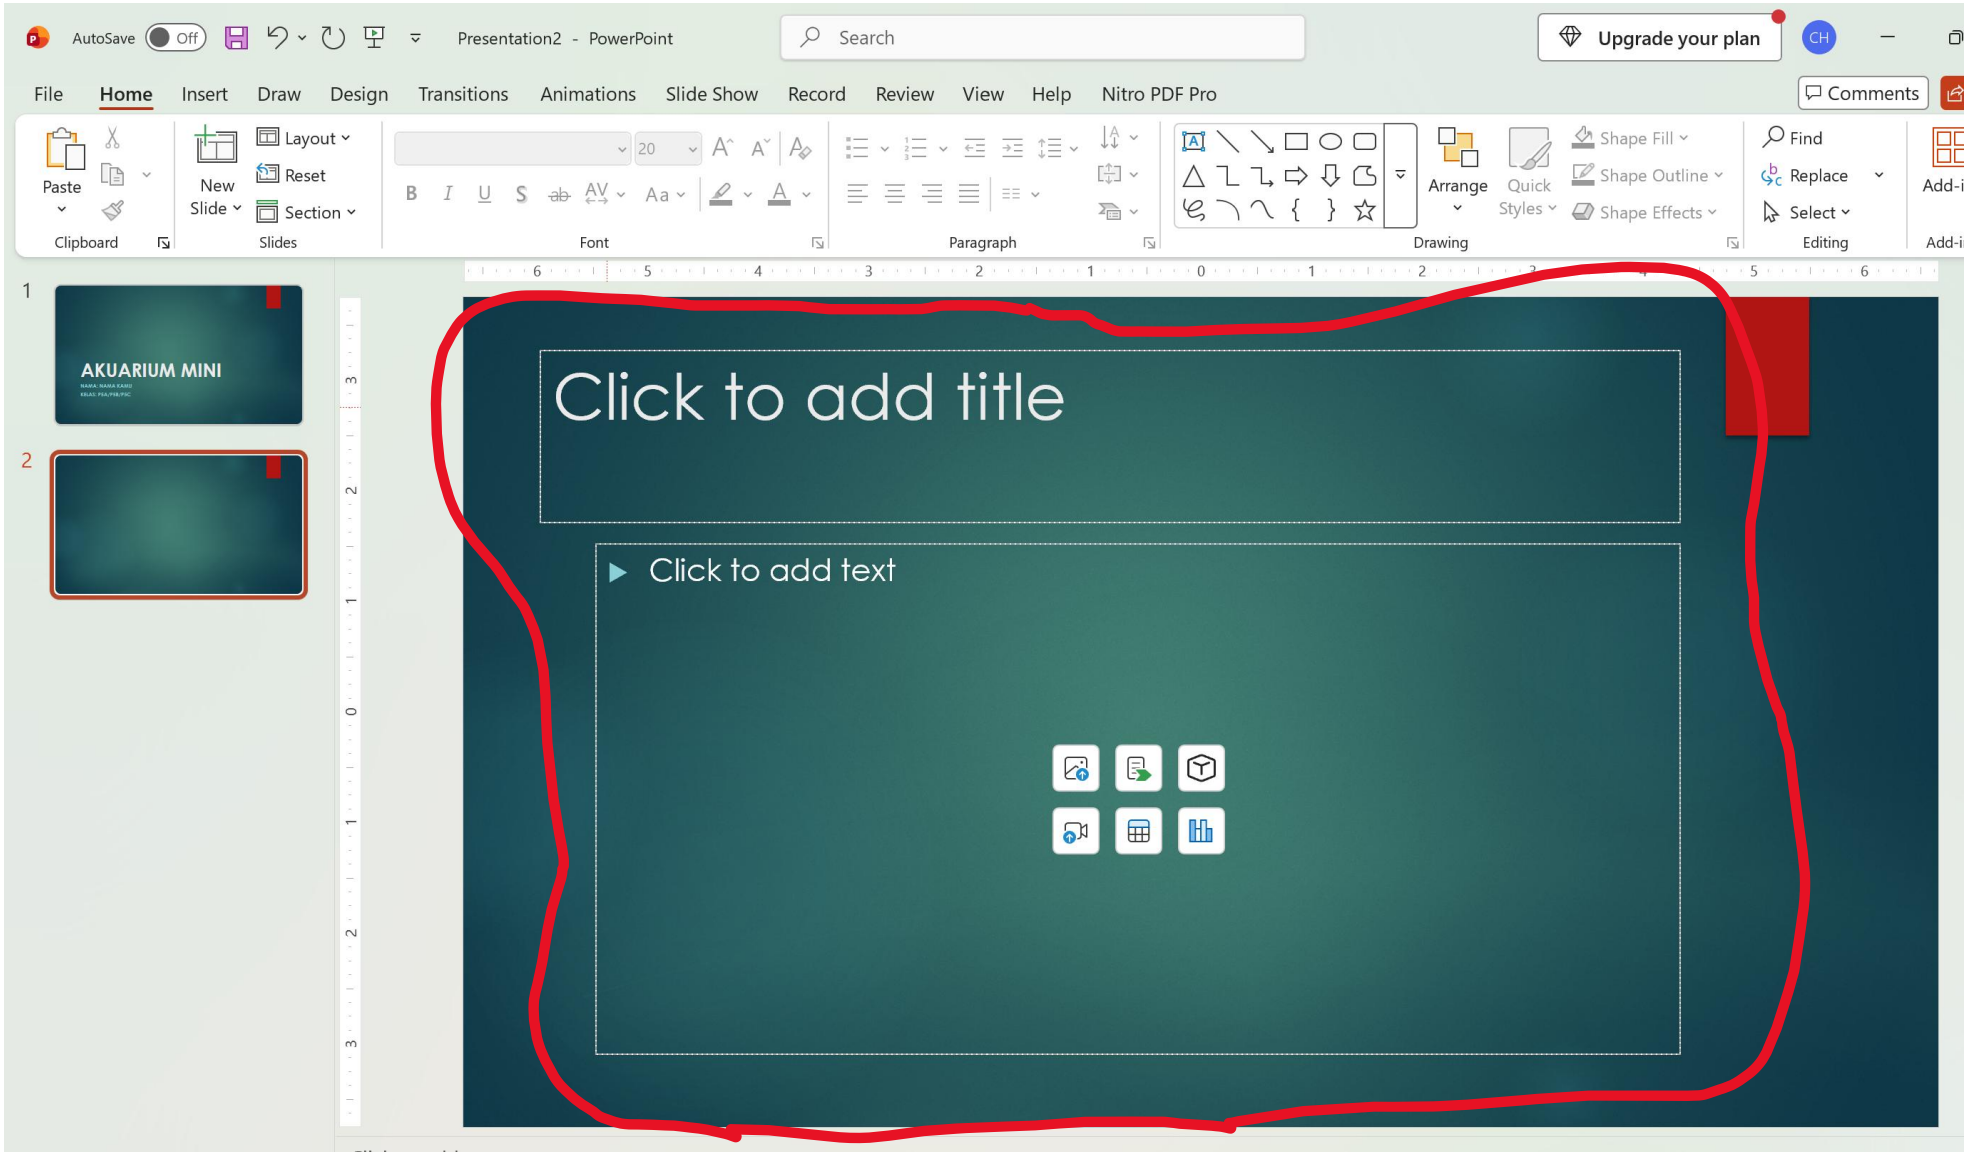

Buat Judulnya “AKUARIUM MINI”
