

No.	Steps	Picture
1	Open Scratch	
2	Delete the cat sprite	
3	Choose a Backdrop	
4	Choose backdrop Blue Sky or Blue Sky 2	
5	Choose a Sprite	

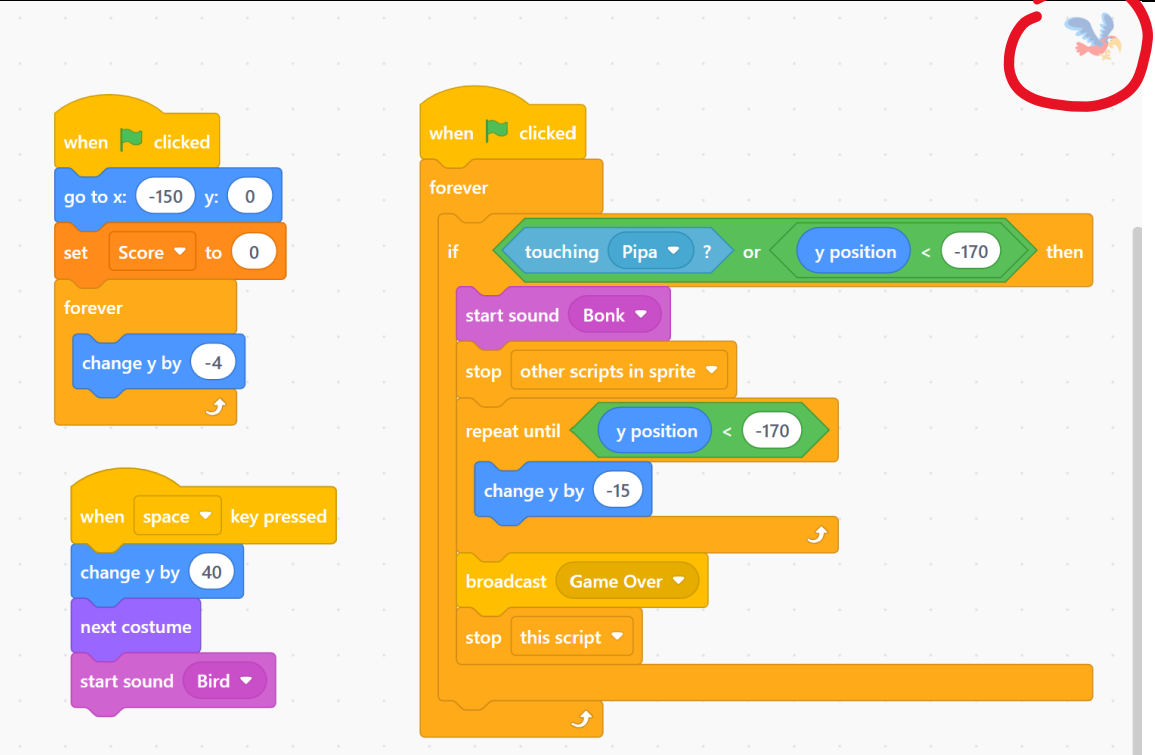

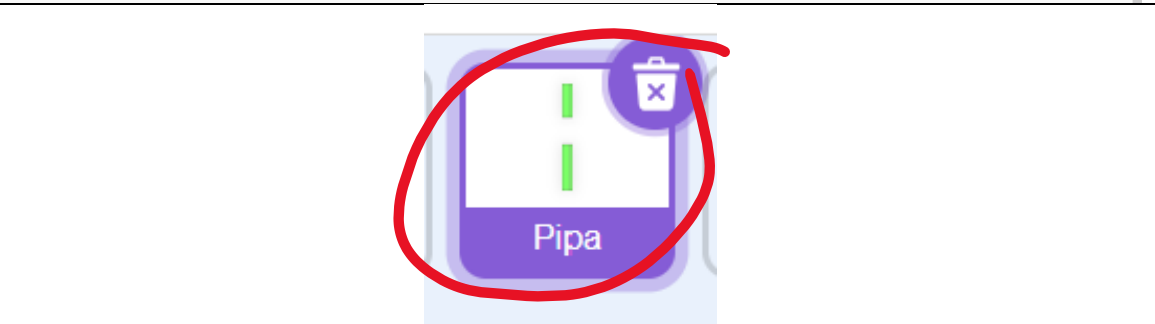

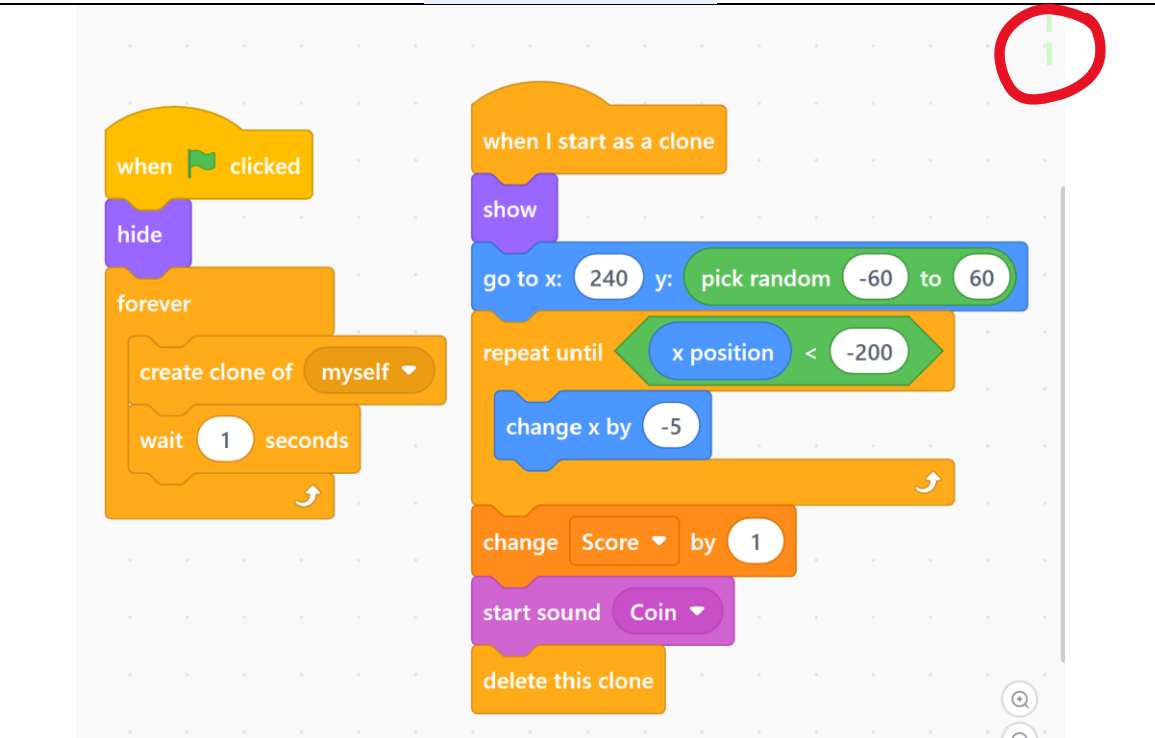

6	Parrot	 A screenshot of a Scratch project. At the top, there is a purple bar with a 'Back' button. Below it is a search bar containing the text 'Parrot'. Under the search bar, a costume preview shows a colorful parrot with the label 'Parrot' underneath it. Red circles highlight the search bar and the costume preview.
7	Click Paint	 A screenshot of a Scratch project. In the center, there is a green button labeled 'Paint'. To the right of the button is a vertical purple toolbar. The toolbar contains several icons: an upload icon, a star icon, a paintbrush icon (circled in red), a magnifying glass icon, and a cat head icon (circled in red).
8	Wait until like this	 A screenshot of the Scratch costume editor. The interface shows a 'Costume' tab with 'costume1' selected. The main area is a large, empty canvas with a light blue background and a grid pattern. A red circle highlights the entire canvas area. On the left, there is a toolbar with various drawing tools. At the bottom, there is a 'Convert to Bitmap' button.

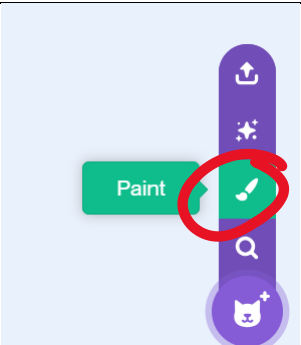

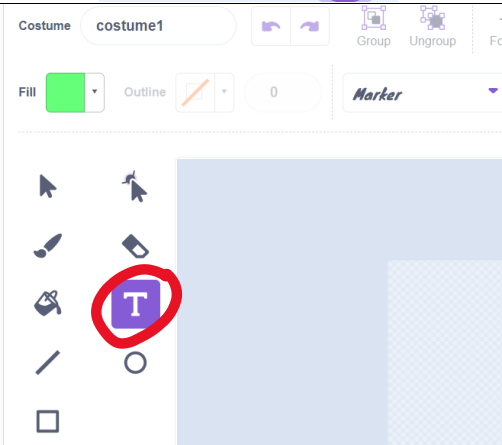

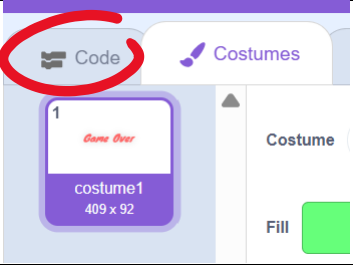

9	Click Rectangle	 A screenshot of the Scratch toolbar. The Rectangle tool, represented by a purple square with a white outline, is circled in red. Other tools visible include the Arrow, Lasso, Eraser, Paintbrush, Text tool (T), and Oval tool (O).
10	Make rectangle like this	 A screenshot of the Scratch workspace. On the left, the Rectangle tool is circled in red. On the right, a red rectangle is placed on the stage, also circled in red. The rectangle has blue handles at its corners and a center point. The top toolbar shows options like Costume, Fill, Outline, and various alignment tools.
11	Change the color green	 A screenshot of the Scratch workspace. On the left, the Fill color picker is open, showing a green color selection, and is circled in red. On the right, a green rectangle is placed on the stage, also circled in red. The top toolbar shows options like Copy, Paste, Delete, Flip Horizontal, and Flip Vertical.

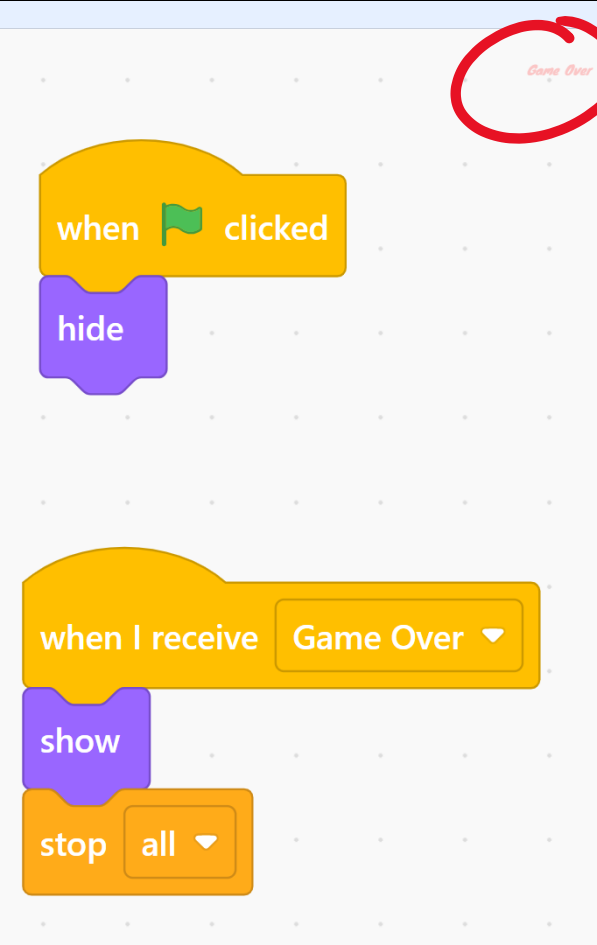

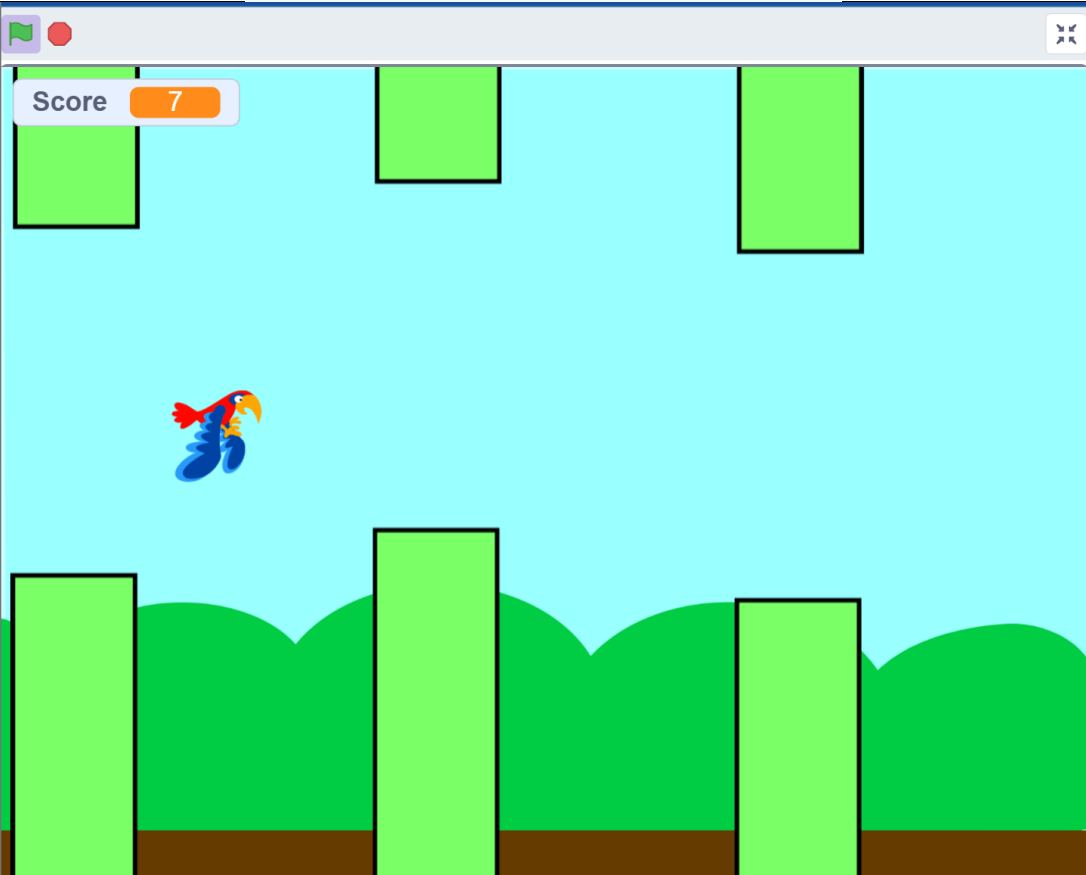

12	Click the cursor	 A screenshot of a software toolbar. The first icon, a purple square with a white cursor arrow, is circled in red. Other icons include a hand, an eraser, a text tool (T), a line tool, and a rectangle tool.
13	Right click copy	 A screenshot of a software interface. A green rectangle is selected on a light blue background. A right-click context menu is open, showing options: 'Save image as...', 'Copy image' (circled in red), and 'Inspect'. The 'Copy' button in the top toolbar is also circled in red.
14	Paste and make rectangle like this and give the space for parrot to pass	 A screenshot of a software interface. Two green rectangles are shown on a light blue background. The top rectangle is taller and narrower, while the bottom one is shorter and wider. Both rectangles are circled in red. The 'Paste' button in the top toolbar is also circled in red.

15	Change name of the spite to "Pipa"	
16	Put the pipa like this	
17	Click Variables	
18	Click Make a Variable	

19.	Write "Score" click OK	
20	Give the checklist the Score so you can see the score on the game	
21	Click Parrot	

22	Put block code to Parrot	 Scratch code for the Parrot sprite. The code is divided into two main sections. The first section starts with a 'when green flag clicked' block, followed by 'go to x: -150 y: 0', 'set Score to 0', and a 'forever' loop containing 'change y by -4'. The second section starts with a 'when space key pressed' block, followed by 'change y by 40', 'next costume', and 'start sound Bird'. The third section starts with a 'when green flag clicked' block, followed by a 'forever' loop. Inside this loop is an 'if' block with two conditions: 'touching Pipa?' or 'y position < -170'. If either condition is true, it triggers a 'start sound Bonk', 'stop other scripts in sprite', a 'repeat until' loop for 'y position < -170' containing 'change y by -15', a 'broadcast Game Over', and 'stop this script'.
23	Click Pipa	 A button labeled 'Pipa' with a trash can icon in the top right corner. The button is highlighted with a red circle.
24	For Pipa give this block code	 Scratch code for the Pipa sprite. The code is divided into two main sections. The first section starts with a 'when green flag clicked' block, followed by 'hide', and a 'forever' loop containing 'create clone of myself' and 'wait 1 seconds'. The second section starts with a 'when I start as a clone' block, followed by 'show', 'go to x: 240 y: pick random -60 to 60', a 'repeat until' loop for 'x position < -200' containing 'change x by -5', 'change Score by 1', 'start sound Coin', and 'delete this clone'.

25	Click Paint again	
26	Click Text	
27	Make text Game Over	
28	Click Code	

29	Give this Block Code for Game Over	 The image shows two Scratch code blocks on a grid background. The first block is a yellow 'when clicked' block with a green flag icon, followed by a purple 'hide' block. The second block is a yellow 'when I receive' block with a dropdown menu set to 'Game Over', followed by a purple 'show' block and an orange 'stop all' block. A red circle with an arrow points to the 'Game Over' text in the top right corner of the grid.
30	So, the final code is like playing Flappy Bird!	 The image is a screenshot of the Flappy Bird game. It shows a blue bird flying through a light blue sky with green pipes. A score display in the top left corner shows 'Score 7'. The ground is brown with green hills.
