

1	Open Google	
	Search & Open link https://editor.method.ac/	
	Until you can see this canvas page	

You can see on the left there is some tools	
This is a “Select Tool” for moving the object	
This is a “Pencil Tool” for drawing to make the object	 

This is a “Line Tool” to make a line object	
This is a “Square Tool” to make a square object	
This is an “Ellipse / Circle Tool” to make any circle object	

This is the “Shape Tool” it has a lot of shape that you can use

♣️ ♦️ ♥️ ♠️ ♀️

♂️ ♀️ ♀️ ♀️ ♀️

		
	This is “Path Tools” for making any creative lines	
	This is a “Text Tools” for making any text	
	This is a “Zoom Tool” for zooming the page	
	This is a “Eyedropper Tools” for give the any colour	

This is for colouring the shape	
On the right side there are also some setting for title, width, height, colour background, and sizes	

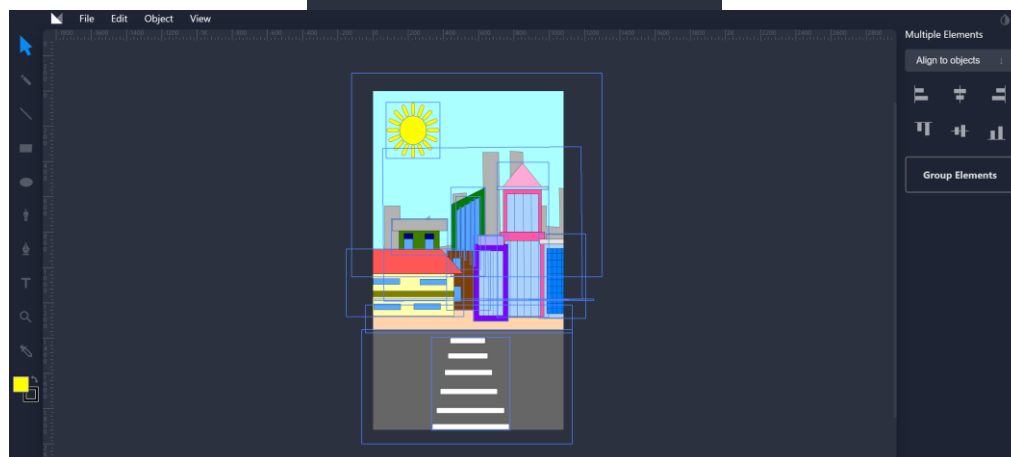

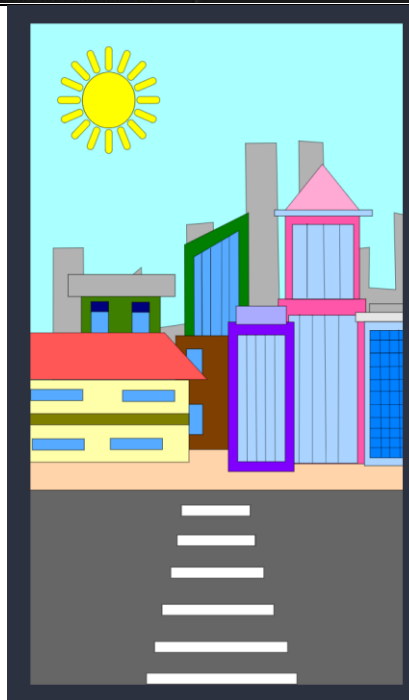

You can choose any different sizes of canvas	
Now you need to do make “Amore Prime School” logo	

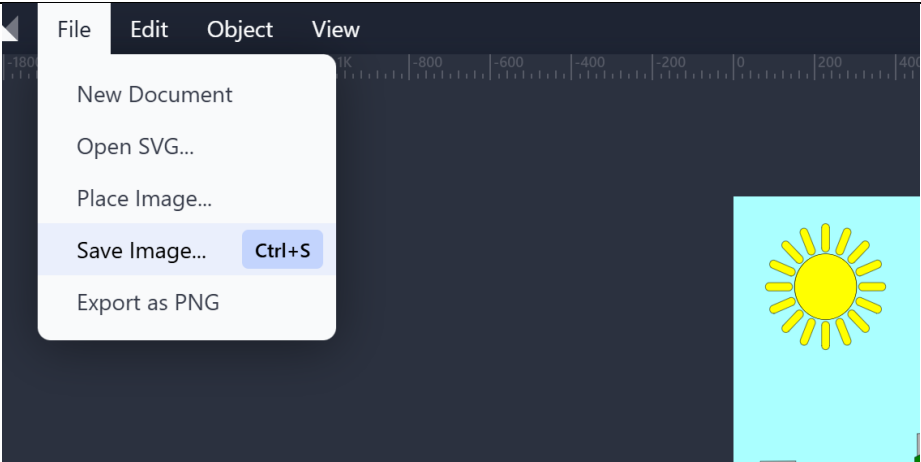

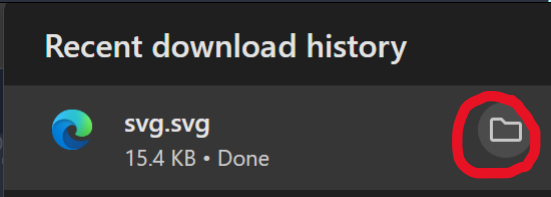

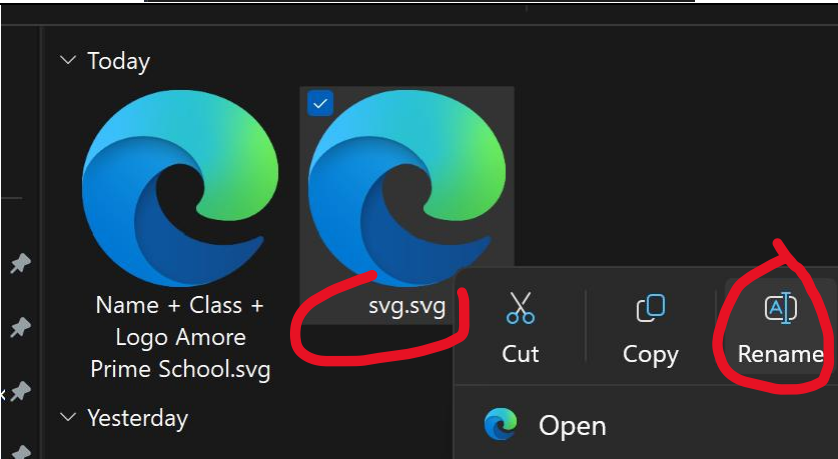

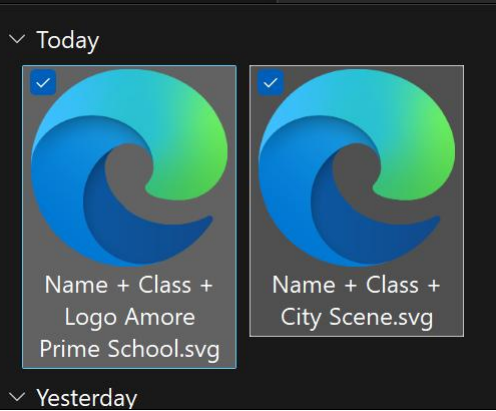

You can do better than mine	 A screenshot of a drawing application interface. The central canvas displays a logo for 'AMORE PRIME SCHOOL'. The logo features a yellow stylized figure holding a green baton, with three green stars above its head, all enclosed within a thin black circle. The text 'AMORE PRIME SCHOOL' is centered below the circle. The application's interface includes a top menu bar with 'File', 'Edit', 'Object', and 'View'. On the left is a toolbar with various drawing tools. On the right, a 'Canvas' panel shows settings for 'Title' (Drawing), 'Width' (800), 'Height' (600), 'Color' (a checkerboard pattern), and 'Stroke' (Custom).
After you finish you need to save it	 A screenshot of the 'File' menu in the drawing application. The menu is open, showing options: 'New Document', 'Open SVG...', 'Place Image...', 'Save Image...' (highlighted with a blue bar and 'Ctrl+S' to its right), and 'Export as PNG'. The background shows parts of the application's toolbar and canvas.
Click the saved file	 A screenshot of a file download notification in a web browser. The notification bar shows the file name 'svg.svg' and its size '11.1 KB • Done'. To the right of the file name is a folder icon, which is circled in red. Below the notification bar, a 'Show in folder' link is visible. The background shows a portion of a web browser interface.
Right click and then you need to rename the file	 A screenshot of a Windows File Explorer window. The left sidebar shows the navigation pane with 'Home', 'Gallery', 'Desktop', and 'Downloads'. The main area shows a file named 'svg.svg' under the 'Today' group. A right-click context menu is open over the file, displaying options: 'Cut', 'Copy', 'Rename' (highlighted with a blue bar), 'Open', and 'Open with'. The 'Rename' option is also labeled with 'Rename (F2)'.

Make sure you save it "Name + Class + Logo More Prime School"

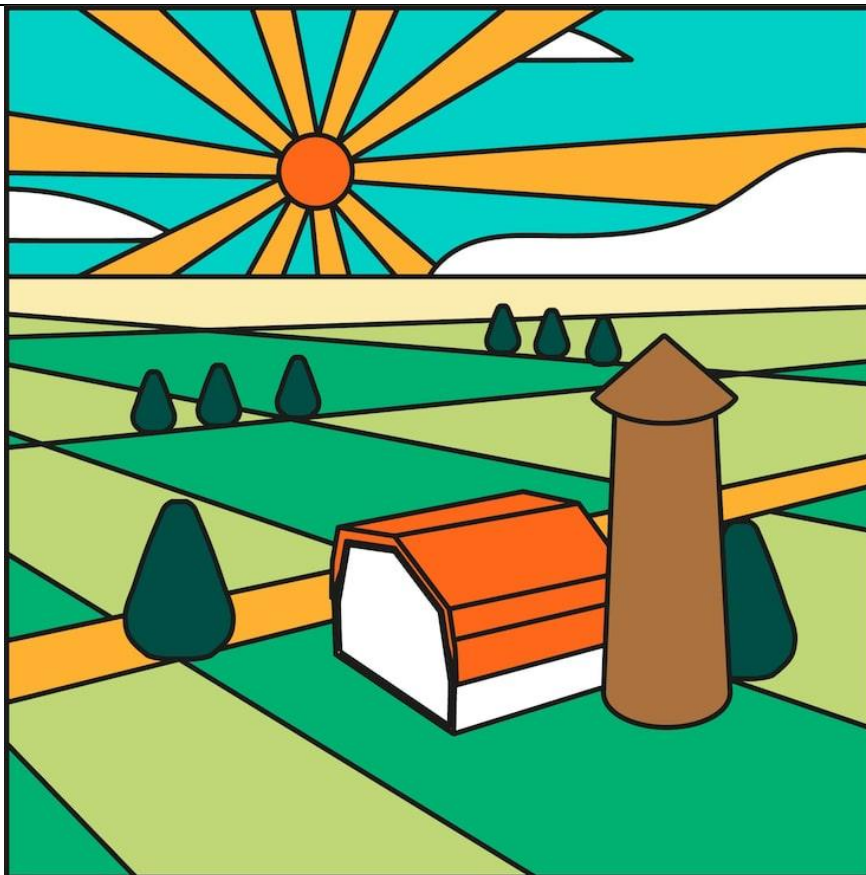

Next please make a city scene drawing like this using shape and make it more creative

Save the result	
Click show in folder	
Rename the file “Name + Class + City Scene”	
Make sure you have 2 file project today	

You can try another scene to make

Save the file with
“Name + Class +
Village”

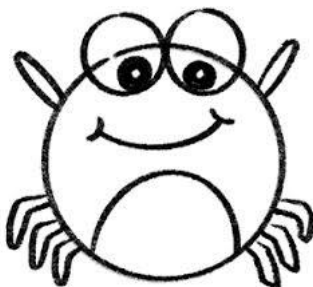

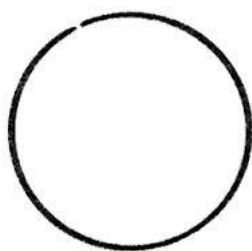

You can try another scene to make

Save the file with
“Name + Class +
Farm”

You can try another scene to make

Save the file with
"Name + Class +
Crab"

Easy Peasy Fun
