

No	Steps	Picture
1	Open Anaconda Navigator	 The image shows the Anaconda Navigator logo at the top, which consists of the text 'Anaconda Navigator' in white on a dark blue rounded rectangle. Below this, there are three icons on a dark background: a yellow folder icon, a green circular icon with a white 'C' inside, and a blue elephant icon.
2	Close pop-up Sign in	 The image shows a pop-up window titled 'Sign in for AI Coding Help' with a close button (X) in the top right corner. Below the title, there is a screenshot of the Anaconda Assistant interface, showing a code editor with 'MyNotebook.ipynb' and the 'Anaconda Assistant 4.0.10' toolbar.
3	Scroll to find Jupyter Notebook and Click Launch	 The image shows a Jupyter Notebook launch dialog. It features the Jupyter logo (an orange circle with a white 'j' and a black dot) and the text 'jupyter Notebook'. Below this, it says 'Web-based, interactive computing notebook environment. Edit and run human-readable docs while describing the data analysis.' At the bottom, there is a blue 'Launch' button. A settings gear icon is in the top right corner.
4	Wait until you see the jupyter notebook	 The image shows the Jupyter Notebook interface. At the top, there is a 'jupyter' logo and a menu bar with 'File', 'View', 'Settings', and 'Help'. Below the menu bar, there are two tabs: 'Files' and 'Running'. The 'Files' tab is active, showing a file browser with a list of items: '/', '3D Objects', and 'adminlte-ci4'. The 'Running' tab is also visible, showing a list of running notebooks.
5	File > New > Notebook	 The image shows the Jupyter Notebook 'File' menu. The menu is open, showing options like 'New', 'Open from Path...', 'Console', and 'Notebook'. The 'Notebook' option is highlighted.

6	Wait until you see pop-up kernel	
7	You can use any "PYTHON" kernel	
8	Click Select	
9	Change the "Untitled" and rename	
10	Go to the cell code	

1	Write and answer this code	[105]: <pre># 51. Menghitung maju dari 1 sampai 5 for i in ? (1, 6): print("Hitungan ke:", i)</pre> <pre>Hitungan ke: 1 Hitungan ke: 2 Hitungan ke: 3 Hitungan ke: 4 Hitungan ke: 5</pre> Isi pilihan ? : a. scope b. range c. extent d. span
2	Write and answer this code	[107]: <pre># 52. Looping isi List (Absen siswa) siswa = ["Aldo", "Beno", "Caca"] ? s in siswa: print("Hadir:", s)</pre> <pre>Hadir: Aldo Hadir: Beno Hadir: Caca</pre> Isi pilihan ? : a. set b. at c. for d. in
3	Write and answer this code	[109]: <pre># 53. Hitung mundur roket dengan While Loop waktu = 3 while waktu > 0: print(waktu, "...") waktu ? 1 print("Meluncur!")</pre> <pre>3 ... 2 ... 1 ... Meluncur!</pre> Isi pilihan ? : a. -- b. -= c. == d. +=

4	Write and answer this code	<pre>[111]: # 54. Membuat pola segitiga siku-siku for i in ?(1, 4): print("*" * i) * ** ***</pre>	Isi pilihan ? : a. scope b. extend c. range d. total
5	Write and answer this code	<pre>[113]: # 55. Tabel perkalian 7 for i in range(1, 6): print(f"7 x ? = {7*i}") 7 x 1 = 7 7 x 2 = 14 7 x 3 = 21 7 x 4 = 28 7 x 5 = 35</pre>	Isi pilihan ? : a. (i) b. [i] c. {i} d. <i>
6	Write and answer this code	<pre>[115]: # 56. Looping dengan Lompatan (Bilangan Loncat 2) print("Loncat 2:", list(?(0, 11, 2))) Loncat 2: [0, 2, 4, 6, 8, 10]</pre>	Isi pilihan ? : a. jump b. sum c. loop d. range
7	Write and answer this code	<pre>[223]: # 57. Berhenti saat ketemu angka 5 for i in range(1, 10): if i == 5: ? print(i, end=" ") print() 1 2 3 4</pre>	Isi pilihan ? : a. stop b. reset c. pause d. break

8	Write and answer this code	[225]: <pre># 58. Skip angka 3 for i in range(1, 6): if i == 3: ? print(i, end=" ") print()</pre> 1 2 4 5	Isi pilihan ? : a. abide b. endure c. persist d. continue
9	Write and answer this code	[121]: <pre># 59. Looping karakter dalam sebuah string ? huruf in "PY": print("Huruf:", huruf)</pre> Huruf: P Huruf: Y	Isi pilihan ? : a. if b. for c. at d. by
10	Write and answer this code	[227]: <pre># 60. Mendapatkan urutan ke-berapa menu = ["Nasi", "Mie"] for index, makanan in ? (menu, start=1): print(f"Menu {index}: {makanan}")</pre> Menu 1: Nasi Menu 2: Mie	Isi pilihan ? : a. number b. order c. sequence d. enumerate
11	Write and answer this code	[125]: <pre># 61. Fungsi Sapaan Dasar ? sapa(): print("Selamat Pagi, Bos!") sapa()</pre> Selamat Pagi, Bos!	Isi pilihan ? : a. for b. at c. by d. def

12	Write and answer this code	<pre>[127]: # 62. Fungsi penjumlahan def tambah(a, b): ? a + b print("Hasil 5+7 =", tambah(5, 7))</pre> Hasil 5+7 = 12	Isi pilihan ? : a. remove b. restart c. return d. replace
13	Write and answer this code	<pre>[129]: # 63. Fungsi Luas Segitiga def luas_segitiga(alas, tinggi): ? 0.5 * alas * tinggi print("Luas segitiga:", luas_segitiga(10, 5))</pre> Luas segitiga: 25.0	Isi pilihan ? : a. remove b. restart c. return d. replace
14	Write and answer this code	<pre>[131]: # 64. Fungsi parameter default (Jika tidak diisi, pakai default) ? pesanan(minum="Air Putih"): print("Anda memesan:", minum) pesanan("Kopi") pesanan()</pre> Anda memesan: Kopi Anda memesan: Air Putih	Isi pilihan ? : a. for b. at c. by d. def
15	Write and answer this code	<pre>[133]: # 65. Fungsi mengembalikan banyak nilai def profil(): ? "Siti", 20 nama, umur = profil() print(f>Nama: {nama}, Umur: {umur}")</pre> Nama: Siti, Umur: 20	Isi pilihan ? : a. remove b. restart c. return d. replace
16	Write and answer this code	<pre>[229]: # 66. Banyak argumen tak terbatas def total_angka(angka): return sum(angka) print("Total argumen:", total_angka(1, 2, 3, 4))</pre> Total argumen: 10	Isi pilihan ? : a. ^ b. / c. = d. *

17	Write and answer this code	<pre>[137]: # 67. Fungsi Cek Prima def ?(n): if n < 2: return False for i in range(2, n): if n % i == 0: return False return True print("Apakah 7 prima?", ?(7))</pre> Apakah 7 prima? True	Isi pilihan ? : a. not_prime b. the_prima c. p_prima d. is_prima
18	Write and answer this code	<pre>[231]: # 68. Fungsi anonim pendek satu baris kuadrat = ? x: x * x print("Kuadrat 6:", kuadrat(6))</pre> Kuadrat 6: 36	Isi pilihan ? : a. function b. lambda c. anonym d. synonym
19	Write and answer this code	<pre>[233]: # 69. Mengalikan 2 semua isi list angka_list = [1, 2, 3] dikali_dua = list(?(lambda x: x*2, angka_list)) print("Map kali 2:", dikali_dua)</pre> Map kali 2: [2, 4, 6]	Isi pilihan ? : a. at b. by c. map d. for
20	Write and answer this code	<pre>[235]: # 70. Saring angka > 5 data = [3, 8, 2, 9, 4] hasil_filter = list(?(lambda x: x > 5, data)) print("Angka lebih dari 5:", hasil_filter)</pre> Angka lebih dari 5: [8, 9]	Isi pilihan ? : a. sifter b. gauze c. filter d. strain
21	Write and answer this code	<pre># 71. Menghitung akar kuadrat import math import random from datetime import datetime print("Akar dari 64 adalah:", math.?(64))</pre> Akar dari 64 adalah: 8.0	Isi pilihan ? : a. sqr b. sqrt c. pow d. root

22	Write and answer this code	<pre>[239]: # 72. Menggunakan nilai 3.14 print("Nilai Pi:", math.?)</pre> Nilai Pi: 3.141592653589793	Isi pilihan ? : a. phi b. pi c. pii d. phii
23	Write and answer this code	<pre>[151]: # 73. Fungsi pangkat dari Math print("2 pangkat 5 adalah:", math.?(2, 5))</pre> 2 pangkat 5 adalah: 32.0	Isi pilihan ? : a. root b. sqrt c. sqr d. pow
24	Write and answer this code	<pre>[153]: # 74. Membuat angka acak (Dadu 1-6) print("Lempar dadu dapat angka:", random.?(1, 6))</pre> Lempar dadu dapat angka: 1	Isi pilihan ? : a. randint b. randit c. random d. int
25	Write and answer this code	<pre>[155]: # 75. Memilih secara acak dari List (Pilih pemenang doorprize) peserta = ["Rudi", "Bowo", "Siska"] print("Pemenang:", random.?(peserta))</pre> Pemenang: Siska	Isi pilihan ? : a. choose b. choice c. random d. select
26	Write and answer this code	<pre>[9]: # 76. Mengacak urutan List lagu = ["Lagu A", "Lagu B", "Lagu C"] random.?(lagu) print("Playlist acak:", lagu)</pre> Playlist acak: ['Lagu C', 'Lagu B', 'Lagu A']	Isi pilihan ? : a. shuffle b. suffle c. shufle d. suffel

27	Write and answer this code	<pre>[159]: # 77. Mendapatkan waktu saat ini sekarang = ?.now() print("Waktu sekarang:", sekarang)</pre> Waktu sekarang: 2026-09-17 13:17:20.228380	Isi pilihan ? : a. datetime b. datetime c. time d. date
28	Write and answer this code	<pre>[161]: # 78. Format Tanggal menjadi string (Hari-Bulan-Tahun) print("Tanggal diformat:", sekarang.?("d-%m-%Y"))</pre> Tanggal diformat: 17-09-2026	Isi pilihan ? : a. strftime b. stringftime c. strftime d. srtftime
29	Write and answer this code	<pre>[163]: # 79. Mengetahui tahun saat ini saja print("Tahun ini:", sekarang.?)</pre> Tahun ini: 2026	Isi pilihan ? : a. time b. now c. year d. times
