

No	Steps	Picture
1	Open Anaconda Navigator	 The image shows the Anaconda Navigator logo at the top. Below it, there are three icons: a yellow folder icon, a green circular icon with a white 'C' (highlighted with a red circle), and a blue elephant icon.
2	Close pop-up Sign in	 The image shows a pop-up window titled "Sign in for AI Coding Help". In the top right corner, there is a red circle around a close button (an 'X' icon).
3	Scroll to find Jupyter Notebook and Click Launch	 The image shows a Jupyter Notebook launch window. At the bottom, there is a blue "Launch" button highlighted with a red circle.
4	Wait until you see the jupyter notebook	 The image shows the Jupyter Notebook interface. The "File" menu item in the top left is circled in red.
5	File > New > Notebook	 The image shows the Jupyter Notebook interface with the "File" menu open. The "New" option is circled in red, and a red arrow points to the "Notebook" option in the sub-menu, which is also circled in red.

6	Wait until you see pop-up kernel	
7	You can use any "PYTHON" kernel	
8	Click Select	
9	Change the "Untitled" and rename NAME + CLASS + PYTHON QUIZ CHP 7	
10	Go to the cell code	

1	Write and answer this code	 <pre>[1]: # 1. Menampilkan iklan di pencarian (SERP) ? ("Promo Diskon 50% Sepatu Olahraga!") Promo Diskon 50% Sepatu Olahraga!</pre>	Isi pilihan ? : a. else b. for c. print d. not
2	Write and answer this code	 <pre># 2. Menyimpan kata kunci (keyword) kata_kunci = "tas selempang murah" print("Keyword yang diinput audiens:", ?) Keyword yang diinput audiens: tas selempang murah</pre>	Isi pilihan ? : a. Kata_Kunci b. Kata_kunci c. kata_kunci d. kata_Kunci
3	Write and answer this code	 <pre># 3. Menghitung total biaya Pay Per Click (PPC) jumlah_klik = 100 harga_cpc = 2000 total_biaya = jumlah_klik * harga_cpc print("Total pengeluaran iklan: Rp", ?) Total pengeluaran iklan: Rp 200000</pre>	Isi pilihan ? : a. Total_Biaya b. Total_biaya c. total_Biaya d. total_biaya
4	Write and answer this code	 <pre># 4. Mengecek apakah sisa saldo cukup untuk iklan tayang saldo = 50000 biaya = 75000 if saldo >= biaya: print("Iklan berhasil tayang") ?: print("Saldo habis, iklan dihentikan sementara") Saldo habis, iklan dihentikan sementara</pre>	Isi pilihan ? : a. if b. else c. elif d. print
5	Write and answer this code	 <pre># 5. Menghitung ada berapa kata kunci yang kita pasang di Google Ads daftar_keyword = ["sepatu", "sandal", "kaos"] jumlah_kata_kunci = len(daftar_keyword) ? ("Total kata kunci iklan ada:", jumlah_kata_kunci) Total kata kunci iklan ada: 3</pre>	Isi pilihan ? : a. if b. else c. elif d. print

6	Write and answer this code	 <pre># 6. Membuat daftar target lokasi iklan (Geomapping) lokasi_iklan = ["Jakarta", "Bandung", "Surabaya"] print("Iklan akan tayang di kota:", ?)</pre> Iklan akan tayang di kota: ['Jakarta', 'Bandung', 'Surabaya']	Isi pilihan ? : a. lokasi_iklan b. Lokasi_iklan c. lokasi_Iklan d. Lokasi_Iklan
7	Write and answer this code	 <pre># 7. Menambahkan keyword baru ke dalam kampanye iklan daftar_keyword = ["sepatu pria"] daftar_keyword.?("sepatu wanita") print("Update daftar kata kunci:", daftar_keyword)</pre> Update daftar kata kunci: ['sepatu pria', 'sepatu wanita']	Isi pilihan ? : a. insert b. attach c. append d. subjoin
8	Write and answer this code	 <pre># 8. Menghitung biaya rata-rata per klik (Average CPC) total_pengeluaran = 100000 total_klik = 50 cpc_rata_rata = total_pengeluaran / total_klik ?("Harga rata-rata satu klik: Rp", cpc_rata_rata)</pre> Harga rata-rata satu klik: Rp 2000.0	Isi pilihan ? : a. else b. for c. print d. not
9	Write and answer this code	 <pre># 9. Membuat CTA huruf kapital semua cta = "beli sekarang" cta_kapital = cta.?() print("Tombol Ajakan:", cta_kapital)</pre> Tombol Ajakan: BELI SEKARANG	Isi pilihan ? : a. bigger b. huge c. upper d. capital
10	Write and answer this code	 <pre># 10. Menggabungkan teks dan variabel untuk Laporan otomatis klik = 150 ?(f"Hebat! Iklan Anda mendapatkan {klik} klik hari ini.")</pre> Hebat! Iklan Anda mendapatkan 150 klik hari ini.	Isi pilihan ? : a. else b. for c. print d. not

11	Write and answer this code	 <pre># 11. Menyalakan status kampanye iklan agar mulai tayang iklan_aktif = True ? ("Apakah kampanye sedang berjalan?", iklan_aktif) Apakah kampanye sedang berjalan? True</pre>	Isi pilihan ? : a. else b. for c. print d. not
12	Write and answer this code	 <pre># 12. Mengecek apakah pengguna mencari produk diskon pencarian_user = ["sepatu", "murah", "bandung"] if "murah" ? pencarian_user: print("Kata diskon terdeteksi. Tampilkan iklan promo!") Kata diskon terdeteksi. Tampilkan iklan promo!</pre>	Isi pilihan ? : a. in b. out c. at d. on
13	Write and answer this code	 <pre># 13. Mengubah input saldo dari teks ('string') menjadi angka input_budget = "500000" budget_angka = ?(input_budget) print("Budget iklan Anda bulan ini: Rp", budget_angka + 50000) Budget iklan Anda bulan ini: Rp 550000</pre>	Isi pilihan ? : a. int b. num c. str d. print
